In the Claims

Please amend the claims set of the subject application pursuant to 37 C.F.R. § 1.121 as follows:

1. - 88. (Canceled)

89. (Currently Amended) A method for reducing expression in a human cell of a gene, the expression of which ~~is inducible~~ has been induced by an extracellular polypeptide that activates NF- κ B to act as an intracellular messenger to transmit a signal that induces expression of the gene from the plasma membrane of the cell to the nucleus of the cell, which method comprises contacting the cell with a composition that diminishes the activity of NF- κ B so as to thereby reduce expression of the gene in the cell.
